ABOUT

Magdemy is the brainchild of Magnifura Technologies. Giving importance to skill and the thought process behind it, has been our vision and creating such minds in this younger generation is our mission. All the jobs from IT to other jobs of various sectors demand an active and creative mind that learns the skills required in the best ideal way and implement them in the ideal practical way. This cannot be guaranteed by a mark focussed education system. So, here at Magdemy, we are very particular to focus on our student's skill enhancement and career grooming for becoming job ready, before they complete the degree they are pursuing. Magdemy is one of the best initiatives by Magnifura Technologies. All our students love the way we groom them and trust us so much that they are all already relieved that their career will be all successful because they are at Magdemy. Being in the industry, believing in the fact that an organization's success purely depends upon the workforce and their skills, Magdemy always rises to the cause of creating the best skilful minds in the respective career pools.

BUNDLES

Today’s industry is full of start-ups and established tech MNCs. All of them believe in just one thing - “What if my employee knows many things and that most of the work can be done by lesser number of employees, instead of many”. Obviously, a person who knows a complete set of skills is preferred to someone who knows just one or two among the set. Our patrons being experienced in the respective career pools have identified what group of skills are required to be mastered by the individuals to get a job and sustain in that job. These identified group of skills that were bundled together by our patrons is what we call “Bundles”. Magdemy aims to make the individuals not only job-ready but also excellent competent unmatchable individuals with a bundle of skills that will not only land them in great jobs but will go an extra mile in making them the most needed workforce of the company in which they work and thus giving them a permanent secure career for a greater period of time.

These bundles have been so carefully crafted that they are more than enough for any individual to secure their career in the area they prefer.

Why not know more when Magdemy offers you bundles? Get started and enrol yourself in some bundle and watch your career reach great heights.

FULL STACK DESIGN

Description

Full Stack Design starts with basic introduction to design all the way up to in-depth UX and UI of a web/mobile app and website.

Pre-Requisites

Problem Solving Skills

Logical thinking ability

Basic knowledge on Mobile/Web Apps, Websites & its uses

Thinking from others point of view

Course Outcome

The Course Outcome is that the pupil would have learnt in-depth UX and UI Design & one of the tools like Figma, XD, etc. enabling them to design from scratch, low to high fidelity UX & UI prototypes for website & web apps.

SYLLABUS

- UX & Business
- UX Basics
- UX Design Strategies
- Design Thinking
- User Research
- Usability Testing
- UX Flow In-Depth
- Color Theory
- Gestalt Theory
- UI Deliverables & Tools
- Live Projects

125+ Hours

**For detailed syllabus, please send a request mail to info@magdemy.com*

FULL STACK FRONT-END DEVELOPMENT

Description

Front-End Development starts with basic introduction to programming all the way up to developing the entire front-end of a web-app and website along with additional frameworks.

Pre-Requisites

Logical thinking ability

Basic knowledge on Websites and its uses

Interest to explore new things

Course Outcome

The Course Outcome is that the pupil would have learnt HTML, CSS, JS & one of the Web Frameworks enabling them to develop responsive deploy ready Webpages for website and web apps.

SYLLABUS

- Logical & Analytical
- C
- C++
- OOPS
- HTML5
- CSS3 & BootStrap
- Java Script
- Angular Framework
- API Integrations
- Live Projects

125+ Hours

**For detailed syllabus, please send a request mail to info@magdemy.com*

FULL STACK BACK-END DEVELOPMENT

Description

Back-End Development starts with basic introduction to programming all the way up to understanding OOPS, DBMS & developing the entire back-end of a web-app and website along with additional frameworks.

Pre-Requisites

Logical thinking ability

Problem solving skills

Basic knowledge on Front-End Development

Practical Implementation Skills

Course Outcome

The Course Outcome is that the pupil would have learnt OOPS, MySQL, Java/Python & one of the backend Frameworks (SpringBoot/Django) enabling them to develop seamless backend code & deploy accordingly.

SYLLABUS

- Logical & Analytical
- C
- C++
- OOPS
- Java / Python
- SpringBoot / Django
- SQL
- Microservices /REST Framework
- Live Projects

125+ Hours

**For detailed syllabus, please send a request mail to info@magdemy.com*

FULL STACK DEVELOPMENT

Description

Full Stack Development starts with basic introduction to programming all the way up to entire Front-End & Back-End of a web-app and website.

Pre-Requisites

Logical thinking ability

Basic knowledge on Websites, Web-app and its uses

Problem solving skills

Practical Implementation Skills

Course Outcome

The Course Outcome is that the pupil would have learnt Front-End Development, Back-End Development & one of both Web App Frameworks and Back-End Frameworks enabling them to develop and deploy seamless robust website and web/mobile apps.

SYLLABUS

- Basic Programming
- HTML, CSS, JS & Bootstrap
- Angular / REACT
- SQL
- Java / Python
- SpringBoot / Django
- Deployment Techniques
- Live Projects

150+ Hours

**For detailed syllabus, please send a request mail to info@magdemy.com*

MOBILE APPLICATION DEVELOPMENT

Description

Mobile Application Development starts with basic introduction to programming all the way up to developing the entire android and iOS applications.

Pre-Requisites

Logical thinking ability

Basic knowledge on Mobile Apps and its uses

Interest to explore new things

Practical Implementation Skills

Course Outcome

The Course Outcome is that the pupil would have learnt Basic Programming Languages and a framework called Flutter enabling them to develop excellent aesthetic mobile apps, both in android and iOS.

SYLLABUS

- Logical & Analytical
- C
- C++
- OOPS
- Java
- Basic Design Knowledge
- Flutter
- Java Script
- API Integrations
- Live Projects

100+ Hours

**For detailed syllabus, please send a request mail to info@magdemy.com*

FULL STACK DESIGN & DEVELOPMENT

Description
